

Piano

Versatility & comfort

The Piano modular seating system provides high levels of comfort dressed in a bold, architectural style. The diversity of the range allows an infinite variety of configurations to be created.

Bold efficiency

Utilising Piano it is possible to achieve the very best use of available space in public, student or visitor areas. Furthermore the visual appeal of Piano will enhance the quality of any interior design.

The complete range

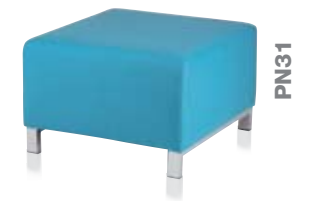

Piano is a bold modular seating design with no compromises.

What lies beneath a stylish exterior can often be less than appearances might suggest.

Not with Piano. The frames are constructed using solid beech and beech ply, screwed and glued together for maximum strength and durability. The seats are upholstered over generously thick, top grade foam which is then supported by a net of sprung webbing. The arms and backs can be upholstered in contrasting fabrics to further expand the design possibilities. The supporting end frames are platinum epoxy coated, steel tube. Alternatively the units can be specified with individual chrome or polished beech wood feet.

Optional Features

- Linking
- Chrome feet
- Polished beech feet
